# MẮT TRẦN ENSEMBLE

Mắt Trần Ensemble\* is a collective founded with a desire to push the boundaries of the performing arts. Mắt Trần's stories are designed to break down barriers of age, space, and language. By creating a contemporary storytelling language with movement, puppetry and breath, Mắt Trần is committed to bringing exciting performances to diverse audiences.

Mắt Trần's performances, workshops, and education and public programs center on communities. They have taken their stories all over Vietnam, performing in local festivals as well as makeshift venues, from big cities to remote areas. Mắt Trần has also performed internationally at the Pesta Boneka puppet festival (Indonesia), Asian Youth Theatre Festival (AYTF), and most recently the Eye See Ai project at the Hijinx Theater (Wales).

(\*): Mắt Trần, meaning Naked Eye: to see something as is, without the help of special instruments such as laser or X-ray.
